

Richa [no last name]
c/o 600 Cass Av. S.E.
Grand Rapids, MI 49503

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. Do we really want to be known for following China's lead in censoring internet communication? The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. I am a Comcast customer, and was shocked and angered that privacy was being violated in this case. I use the internet a lot to research different points of view, and historical content that presents such same views. Open lines are vital to the ability to obtain any sources of thought that exist around the globe. How can we be educated citizens of the world, if we are repressed in our ability to send or receive such important information. Any interference is akin to book burnings and dictatorship. This is not what this country is supposed to represent. Are corporations the new dictator class?

Dear Comcast; In October 2007, the Associated Press confirmed the story that indicates that you, Comcast "actively interferes with attempts by some of its high-speed Internet subscribers to share files online, a move that runs counter to the tradition of treating all types of Net traffic equally." Then the story from Wikipedai continues; (see Wikipedia Comast entry). Now there is also evidence of Comcast using RST packets on groupware applications that have nothing to do with file sharing. Kevin Kanarski, who works as a Lotus Notes messaging engineer, noticed some strange behavior with Lotus Notes dropping emails when hooked up to a Comcast connection and has managed to verify that Comcast's reset packets are the culprit. A lawsuit, Hart v. Comcast, has been filed accusing Comcast of false advertising and other unfair trade practices for allegedly advertising unlimited high-speed internet access while in reality working to restrict their customers' usage of the internet. Stop the your raid on Internet neutrality. Clean up your ethic department. Sincerely; Kirk Atton PS. Sure sounds like you treated Ms. Mona Shaw poorly. You got of love a 75 year old women that take matters into her own hands.

Saline, MI 48176

I believe the most important job of the FCC is to PROTECT the Open Internet which is an extension of Our Democratic Rights guaranteed under the Constitution of the United States. Amendment I Congress shall make NO law respecting an establishment of religion, or prohibiting the free exercise thereof; or ABRIDGING THE FREEDOM OF SPEECH, or of the PRESS; or the right of the people to peaceably to assemble, and to petition the Government for a redress of GRIEVANCES. Amendment IV The right of the people to be secure in their persons, houses, PAPERS, and EFFECTS, against UNREASONABLE searches and seizures, shall NOT BE VIOLATED, and NO WARRANTS shall issue, but upon probable cause, supported by OATH or affirmation, and particularly describing the place to be searched, and the persons or things to be seized. The Associated Press caught Comcast secretly blocking users' ability to use peer-to-peer software to share information with one another. Comcast was using Web filtering technologies similar to those used in CHINA to CENSOR the Internet. AP called the violation "the most drastic example yet of data discrimination." Blocking our access to the Internet should never be tolerated. The FCC must severely punish and make an example of Comcast's violation of the UNITED STATES CONSTITUTION AND OUR DEMOCRACY so more companies will NOT continue Comcast's actions and invest in technologies to CENSOR and manipulate what we can do online and with whom we are allowed to communicate. Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Peer-to-peer communications are an evolution of the Internet and a vital tool for organizations of all sizes to disseminate the larger and larger files of a modern age (multimedia, we'd all agree, is the future of the Internet). AT&T, in particular, should not be able to block P2P communications or modify their transmission in any way. To do so is to degrade the Internet, not to "manage" it as they claim.

This morning, my local Comcast Cable blocked C-Span Washington Journal, channel 25, with a commercial gospel music program elsewhere offered (channel 173). I highly suspect it is because of the hearings yesterday and not wanting this discussed through the call-in program of Washington Journal this morning. These seems more than coincidental. None of the other channels in my cable were different. Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality

protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. Brighton, MI 48114

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. I have experienced unusual limitations in my own service through Comcast and have suspected direct censorship and limited access to the services I pay for. I intend to sever all my ties with this company. I have been vindicated in my suspicions. This is not 'Free Press' Nor the "Free Market" this is the Corporate Agenda which has no affiliation nor Allegiance to the citizens of this country nor any other they infiltrate. Companies claiming US allegiance must practice business Ethics that are condoned by the citizens of this country. They are Flying Our Flag and using our influence. Strict Licensing for our Reputation and Their Access to the benefits of such loyalty to our nation and our Principles. They are Presenting a Face of this Country in everything they do- they should be held accountable and respect the 'gift' they have been granted by US! We know what was being attacked on 9/11 (and all other 'terrorist' acts over the last 40 yrs), and we intend to hold them accountable for the 'Reckless Endangerment' and High Crimes they have committed, along with all their 'entity' minions like the Telecom industry- 'Ministry of Truth'; Propaganda, Censorship and 'mind control' Dept. If I had local Options

rather than just this 'Monopoly' I would think we still had a free market and this was a company I would not support. But they have been allowed to practice such Facist methods thanks to our "public Servants' who've benefit by this corrupt liason. Mac' not introuble because of an illicit affair- it's beacuse he is an 'operative' to not only Telecoms, but their common sponsors. The Constitution was Written for "WE THE PEOPLE" not organized for Profit entities. They are Tools for Mankind progress, not the other way around. Hold these Brick and Mortars responsible for the Crimes against this country and Humanity. Start with the Telecoms, they will be the first to 'Talk' to save their livlihood in the future. Lead US to Your Master's, And we may show mercy on your Corporate souls.

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Canton, MI 48187

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Kenn Christopher
42457 Parkhurst Road
Plymouth, MI 48170

Comcast's outrageously blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow self-centered, greedy corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Jeff DeBoer
4075 4 mile rd NE
Grand Rapids, MI 49525

Comcast has blocked and hindered my internet traffic on a repeated basis, and I have been all but powerless to do anything about it. I am a comcast customer, although not by choice, they own a monopoly in my area on high-speed internet. Normally, I would just cancel my internet and subscribe to someone who isn't ripping me off, this is not an option unfortunately. Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. No ISP under any circumstance should ever be allowed "special privileges" or control over the internet, therefore the only regulation that should ever be enacted is to limit their ability to control what isn't there's to begin with. Comcast has over stepped it's bounds, ISP's provide a service to connect to the internet where information is traded freely. They have no right to decide which information gets what level of priority.

409 n arnold St
Mount Pleasant, MI 48858

Peer-to-peer is the future of the Internet, and puts things in the hands of the people, making important communication services (voip & others) stop depending on centralised server models which are less secure, more vulnerable, and less capable. Net neutrality is critical for peer-to-peer networking. Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Troy, MI 48084

Although what follows was written on my behalf, I am sending it as it captures my opinion and belief. I am a Comcast Internet subscriber and a frequent (constant) Internet user. This is both for work and for my personal use. My cost is not inexpensive and I fear that if net neutrality is not preserved that others with fewer resources will be left behind. Please listen to us, the individual Americans you are there to protect. Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. And as an aside, the FCC has allowed the media corporations to consolidate the PUBLIC air waves under far too few hands while at the same time deregulating the industry in such a way that only speaks to maximize profit. This is poison to democracy. Time for the FCC (And all government agencies for that matter) to start being behooving to the American public, as is it's function.

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. The new frontier that is the internet has only gotten to where it is by being free form and open to innovation and creative

thinking. Once we let corporate greed and desire to control interfere with that freedom there may be no turning back.
Thank You.

Pamela Guenzel

Dear FCC--I support this statement: Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. Please act to keep the Internet free and open. Thank you.

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The difference between "before" (the FCC stopped enforcing net neutrality regulations) and "after", is a clear call to the FCC to listen, finally, to the consumer, and stop allowing the regulated to write the regulations. Worse, this "foot-in-the-door" approach, harmful enough in its own right, leads inevitably to crowding out the diversity of opinion and expression which the internet should afford. That diversity is an essential balance to the existing Corporate Media oligopoly in broadcast and print - which the FCC has not merely allowed, but fostered. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Comcast's blocking of bittorrent traffic not only discriminates against pirates, but also customers downloading legitimate materials. Hundreds of small organizations depend on bittorrent for distribution. However, the consequence that I fear is the wholesale filtering of all packets. This would allow Comcast to prioritize services that pay them more over services that do not. This is unacceptable. Comcast must stop this immediately.

Hudsonville, MI 49426

I must preface the comments below by saying that, were it not for the monopolies held by network providers for broadband internet access in their home areas, net neutrality probably would not be necessary. However, in my area, and in many others, only one or two broadband providers offer service. Although cellular and satellite companies offer "broadband" connections (and do compete with one another), but the latency and bandwidth provided by these connections is such that they do not represent true competition for wired Internet Service Providers. Realistically, barring wireless options for their latency issues, and dial-up providers for their speed issues, I (and many other consumers) are left with only one choice for a broadband ISP. Comcast's blocking of peer-to-peer communications is a technical violation of the standards upon which the Internet is built, and a gross disservice to its customers. Effectively, Comcast is charging full price for technically broken connections. From my point of view, as a consumer, if I am paying Comcast (or any other company) for X megabits of bandwidth, I am entitled to use those megabits as I see fit. Would we permit the electric company to offer us 100 kilowatt service, so long as those kilowatts were not used to power an electric car, since the company's sister corporation sold gasoline? The answer is a resounding NO! What if the telephone company had declared that the use of dial-up modems were an abuse of its network, and therefore disabled their use with devices capable of detecting a modem carrier? Would we have the Internet as we know it today? Millions of Americans have come to face similar problems in the absence of Network Neutrality regulations. Comcast sells us a certain amount of

bandwidth, so long as that bandwidth is used in ways that they approve of. This behavior is unconscionable, stifles technological innovation, and violates the technical standards upon which the Internet is based. Without Network Neutrality regulations, this behavior may soon be emulated by other ISPs in any market which lacks sufficient competition. In my area, most markets would be vulnerable to this behavior because they are subject to an ISP monopoly. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

To whom it may concern, Here in Michigan, Comcast is forcing people to "pay additional fees to rent set-top boxes to receive the high-quality educational programming they are currently guaranteed with basic cable service" all while raising cable fees by 13%. This is a state that is economically depressed and suffering already! In addition to this, Comcast is stripping away public access media from towns and cities in MI that depend upon knowledge, awareness and a sense of community to survive. The fact that big corporations are being given such control over content and access of information is rather scary. We are the customer and they should be serving us. But instead, we seem to be serving them and whatever agenda is behind it. This does not ring of a democratic society to me. It is very controlling and suppressing. When Comcast is also allowed to control, monitor, and subsequently prevent access to certain information and media, it sends out a message that our constitutional rights are being silently stripped away and that "we the people" don't matter. Please stop this nonsense and keep this country true to what it is most proud of, being a democracy. Thank you for your time. Callie Johnson

I wish to complain about the selective delaying of packets being implemented by comcast on their highspeed internet service, I do not believe that they have any businesss deciding which types of data merit transmittance on the internet. If they are concerned about the volume of traffic I produce then they need to setup some kind of tiered usage plan to meter me accordingly. As it stands I pay for an unlimited connection to the internet and want to be able to transmit whatever data I want whenever I want.

I can't believe that Comcast has stooped so low. When a major business venture intentionally misleads and misrepresents itself to its customers, it does not deserve public support in the way of trade with it and furthermore has no right to "speak" for anyone (except it's sorry self). I've lost all respect for them as a business and will have nothing in my home from their platform. Deceptive manipulation of individual's accounts or transactions is plain old basic dishonesty. I really hope that the FCC continues to keep the interests of the general citizenry paramount and not businesses that resort to such tactics. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The job of telecommunication companies is to provide the pipelines thru which information travels. They are, however, not the guardians of what that information is or can be. It is not their job to censor that information, regardless of the personal 'moral' views of corporate management. It is not their job to limit who can transmit or receive that information as long as reasonable customer policies are established and followed. It is not their job to determine what method, when otherwise network compatible, can or cannot be used to transmit that information. Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans, myself included, have warned would occur without Net Neutrality protections. The FCC MUST take serious and immediate action to put an abrupt end to this harmful practice and to prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and, above all, free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

As a consumer who pays for service through Comcast, I already pay them exorbitant prices under the assumption that I can TRUST them to provide me exactly what I pay for: A contracted delivery of a set amount of bandwidth for my personal use regardless of the type of traffic. They violated my trust, our contract, and THE LAW. Comcast has no right to police the internet and it's use. Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. Kentwood, MI 49512

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. This is not the first illegal and unethical act engaged in by Comcast, as evidenced by the class-action suit against them, and my family's own personal experience of double-billing and deceptive billing practices. Unfortunately, in West Michigan's metropolitan Grand Rapids area, if we want decent cable TV, we have no other choice but to use Comcast. This monopoly is at the heart of the problem. We have canceled our service twice, only to re-sign because we needed both high-speed internet and decent educational TV choices, since we are both educators. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Adam Lax
512 Hill Street
Ann Arbor, MI 48104

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. The FCC must take a stand on this issue and ensure a unhindered Internet. As a medium that's become increasingly important as a tool for communication, the Internet must be preserved so that no telecommunication corporation can control and dominate its content. It's an extension of our own freedom of speech that's at stake here. Please do the right thing!

Howard Yale Lederman
2239 Cumminga Avenue
BERKLEY, MI 48072

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow monopolists to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. I want to emphasize the harmful impacts of Comcast's actions on future internet competition. If Comcast can block peer-to-peer communication, it can also block other forms of communication. The impact would be to stifle competition. An important purpose of the internet is to promote free competition in ideas, products, and services. Comcast's acts were a step towards establishing a future monopoly on the internet. Thus, the Sherman Antitrust Act's treble damages provision should serve as a model for strong sanctions against Comcast to deter it and future monopolists from monopolistic conduct. Finally, I want to emphasize the importance of the internet being a bastion of free speech. As you know, free speech is a hallmark of ours and any democratic system. Thus, strong FCC action is necessary to assure that the internet does not become subject to the whims of totalitarians and totalitarian regimes. Thank you for your consideration of my comments. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Clare Levijoki
402 S. State Street
Ann Arbor, MI 48109

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. Furthermore, Comcast and the AT&T conglomerate are both verging dangerously close to the level of monopolies--some would say they have already become monopolies in their own right. The lack of competition has led to unfair pricing in my area, and I would assume in most other areas of the country. At this point I would welcome any curtailment of these companies' continued takeover of the vital realm of communication.

Linda Lincoln
7035 Fargo Road
Greenwood, MI 48006

Comcast's dishonest and secretive blocking tactics should not be allowed to influence FCC policy on free exchange via internet. We are not blind and you are not invisible: we see the corporate interests involved here and the relentless effort to manipulate and control what should be a public and totally liberated venue. Shame on you if you allow Comcast to continue this effort at strangulation.

Ken Lipka
37137 Amhurst Drive
Westland, MI 48185

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet has become one of the sources where you can get information on the news stories that are really important. Even then you must choose your sources carefully. A daily comparison of stories on news sites such as CNN and Fox news to the stories reported on the BBC Americas site will provide a startling revelation of the stories most mainstream American media outlets don't feel are important(?) enough for you to know about. We cannot allow the same one party allegiance and big business interests to have the same control over the Internet as they do with respect to other forms of media such as tv, radio, newspapers and magazines. Comcast's actions indicate this is their intent. If they have committed violations, they must be stopped before the Internet becomes just another information editing tool used to filter what someone else thinks you should know about. If we don't want the country to become another big brother state, stopping actions like Comcast's is imperative. Dan McClelland

Kathy McCurdy

Hartland, MI 48353

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. The township of Hartland, MI has contracted with Comcast, we have no other cable/high speed internet and they are raking us over the coals in fees. It would be nice to have some competition with other cable sources so citizens of Hartland could take advantage of all the great deals out there. Thank you, ~Sara L. Nolte

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

I hope that you do not ignore Comcast's violation of net neutrality principles in your current investigation (FP-007), and penalize them severely for having already unduly harmed the public. I urge you to acknowledge - through your actions - that your duty is to the public (not corporately-funded think-tanks like the "Progress & Freedom Foundation"), and reverse your previous statements opposing net neutrality legislation. If you really don't think that serving the public trust means supporting net neutrality, then my most urgent request is that you stop drinking kool-aid.

Denis Renaud

Jason Revello
2040 Presque Isle Ave
Marquette, MI 49855

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. I am a student that has spent a great deal of time studying abroad and out of my home state and I use peer to peer services like bit-torrent to deliver pictures and video from my travels abroad to friends and family at home. Without these services, I would have to directly send all of my files one by one to each of my recipients which is 1. extremely time consuming and 2. unbelievable taxing on my own internet connection. Without the uninterrupted aid of these technologies I would not be able to communicate with my friends and family nearly as efficiently. I would hope that the FCC take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The United States prides itself on these values of open communication and freedom of information and I would hope that the FCC make their best effort in protecting these values. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

It is no telecom corporation's job to "police" the internet. They signed on as not gatekeepers but on-ramps to the internet and as such should not be restricting access to content (or the highway to follow the analogy). No corporation has the right to restrict the free flow of information in a democracy. The FCC on behalf of the American public is obliged to investigate this matter and act appropriately. Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers (I say on-ramps to the internet) to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. Do not let the FCC become a pawn of media corporations. Take action to enforce the freedom of the American people and our new avenue of communication and democracy. This is my voice. PLEASE LISTEN!

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. By allowing them to begin filtering traffic you are allowing them to a data version of wiretapping every communication that happens. This means when someone does a financial transaction it could be held by discretion by Comcast just because they dislike the site or bank, or whatever other reason they want to use. The Internet MUST remain neutral to survive, if Comcast wants to filter or block things then they should be 100% responsible for what the users of the network do. Also they should have to disclose EVERYTHING in an agreement before signing up new customers. I once worked for Comcast and quit due to moral conflicts with the company.

We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Christina Snyder
11994 Pleasant Lake Rd
Manchester, MI 48158

Just because Comcast is in the business of selling content doesn't mean they have the right to block others from circulating their own content over the cables they have paid for the right to use without any restrictions on legal content. Corporations have been entrusted with the responsibility to serve as internet service providers in return for their profits - they do not own the internet and can't discriminate in providing access to paying customers based on content, as long as such content is legal. Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem

millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Comcast's gross violation of Net Neutrality is a signal for the American people and its government to act in order to protect the internet, which is a vital tool for economic growth, civic participation, innovation, and free speech. The FCC, as an agent of the American public, must act to protect Net Neutrality by acting swiftly and decisively against Comcast. Now is the time to show all other ISPs that discriminating against the free flow of information is not a tolerable measure.

Ann Arbor, MI 48103

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

Joyce Sweeney
405 Montgomery Ave.
Ann Arbor, MI 48103

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of

discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. To say the least, this is appalling!!!

Jim Sweeney

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. Comcast is acting like rules don't apply to them...they're acting like gangsters, as if they're above the law. Just like Bush and his signing statements where he says he won't enforce or obey laws and legislation passed by Congress, acting like a dictator. Don't let Comcast emulate that criminal behavior.

Robert Switzer

As a Comcast subscriber with no alternative, I'm particularly appalled at the company's blatant and deceptive blocking of peer-to-peer communications, exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

If you will actually pay attention to these comments, that would be fantastic! Telco's have always historically fought that they cannot be held liable for the content carried on their networks (I.E. Voice calls and what is said in them). There is now a requirement of a court order to even request listening to a specific line. How do Comcast and other ISP's feel that they are given special dispensation to monitor my communications that have been protected by privacy acts? Are they fully accepting liability for the actions of their customers now? I also find the actions of Comcast to be entirely unprofessional during the FCC hearing in Boston. I would believe it to be a fair and just act for a very heavy fine to be levied against them for interrupting the way our governing system was intended to function! I am disgusted by the way that the ISP's in the USA are treating their customers and that we are now ranked 26th(!!!) among countries with Internet access for their citizens. We have MUCH slower access speeds than the majority of the world and for much higher prices! If the world is changing and the US is to become the information center (since we are outsourcing just about every other type of job), we are doing a fine job of shooting ourselves in the foot by limiting the amount of data we as an entire country can transfer, and the speed at which we can do so, compared to the rest of the world!! It is time we look at these issues holistically and stop letting these larger companies make all of the decisions for us! Why do we ALL have to pay (with slower connections) when a few are using the Internet for nefarious reasons? That thinking leads to permanent tapping of every phone line in the US because it "Might" be used to conduct illegal activity. That is a world I do not want to live in! Please feel free to contact me for any further information or with any questions or comments. I

do not expect this problem to be solved by yelling and running away. I have a vested interest in seeing a functional system created here, and am willing to do my part to see that it becomes a reality. Thank You! Craig Young

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation.

The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. And I would also recommend researching Peer-to-peer software with your operating systems. It could reduce system load, and increase efficacy.

Comcast's blatant and deceptive blocking of peer-to-peer communications is exactly the problem millions of Americans have warned would occur without Net Neutrality protections. The FCC must take serious and immediate action to put an abrupt end to this harmful practice and prevent other Internet service providers from following Comcast's example of discriminating against the free flow of online information. The Internet is a vital engine for economic growth, civic participation and free speech. We simply can't allow corporate gatekeepers to smother these democratic communications by discriminating against new technologies, secretly interfering with Internet traffic and stifling innovation. As corporate interests gain more and more monopoly control of the public media the importance of the Internet grows for the survival of democracy. It must remain unfettered by corporate interests.
